

## DR. A.T. STILL'S CONCEPT OF THE LAST STAGES OF LIFE AND ITS CLINICAL APPLICATION

4 - 6 November 2021

HAMBURG, GERMANY

### COURSE INFORMATION

"What is physical death but a birth from the second placenta to which life has been attached? If this philosophy be true, death as we call it, is only the delivery of the finished man..." Dr A T Still

Over this course in Germany I would like to offer the opportunity to share my experience of working with people and applying the principles of osteopathy in treating patients at the end of life. We want explore the question – when is treatment intended to help healing and when do we perceive a shift to a process of surrender to a dying process. How can we, as osteopaths, help with this process?

I would like to explore Dr Still's amazing image of the body as a 'second placenta' and how, as with the first placenta that fed and nourished us all, shrunk and was delivered when no longer needed, the second one, our human body, also reaches a point of disengagement.

How can we recognize this process, can we assist it and what sort of conversations do we have with patients around this issue?

I would like to explore this through case studies and practicals and share in a group the sensations and images experienced.

When previously presenting this course, I was struck by the depth of exploration and the excitement of truly applying Dr Still's principles of Osteopathy.

### VITA

**Peter Cockhill BA(Hon) DO FSCCO**

I graduated from The European School of Osteopathy in 1980 – a wonderful eclectic course in osteopathy.

In 1987 I joined the SCTF UK faculty, tutoring on the basic Osteopathy in the Cranial Field course at the British School of Osteopathy. As a founder member of the Sutherland Cranial College of Osteopathy, I have taught as tutor, lecturer and Course Director on all the Pathway modules, in the UK, Germany and Spain over the last 25 years. I am a past Chairman of Trustees of the SCCO.

I have had the privilege of studying in a small group of DO's with Dr Anne Wales in the USA in the 1990's (in her 90's!), exploring Dr Sutherland's approach to the body as a whole, and have also experienced the hands of the late Dr Rollin Becker and Dr Robert Fulford as they visited the UK in the 1980's.

Osteopathy has a great manual tradition of teaching and I feel privileged to be part of a college of fellow osteopaths who are dedicated to the teachings and practice of Drs Still and Sutherland.
